

## 2018 KEY STAGE 1 PROGRAMME

Each Key Stage 1 Discovery Session involves a selection of small animals from a variety of groups (e.g. insects, molluscs, reptiles and mammals) and biofacts that the children can touch and hold.

Each session has particular learning goals, however all of them will touch on habitats, food, classification and conservation.

These are hands-on sessions, with no written work and are designed to bring classwork to life. Children will be encouraged to ask and answer questions and participation of the trusted adults in the group will help the less confident of the children get the most from this experience. If you have particular requirements or would like to order a specific mini-trail (50p trail, with a pen) for use around the zoo, please inform us during your booking.

### **GRUB'S UP!**

Your explorers will meet herbivores, carnivores and omnivores and find out how they fit into a food chain. They can also discover how the right types of foods and exercise keep us and the zoo animals healthy!

### **ANIMAL BABIES**

Come along to Banham Zoo and you'll always see a baby or two! During your Discovery Session your group will learn about animal babies and how they grow, whilst meeting a number of different animals.

### **MINIBEASTS**

How do minibeasts differ from each other and from you and me? Your young explorers will meet a variety of different creatures and find out their special adaptations.

### **WHO LIVES WHERE?: CHOOSE FROM ARCTIC, RAINFORESTS OF THE WORLD OR AFRICA.**

Find out about amazing animal adaptations in our 'Who Lives Where?' sessions. Choose from Arctic or Rainforest habitats or meet animals from a variety of habitats in the Africa session.

### **COLOURS OF THE RAINBOW**

This session explores camouflage, colours and patterns in nature and encourages the use of descriptive vocabulary whilst getting hands on with some colourful creatures!

### **I LIKE TO MOVE IT!**

Get your little explorers moving like animals, whilst learning about basic animal and human anatomy!

### **JUST FOR FUN**

Including animal and biofact handling - this is a great chance for a fun experience at the end of term or when no specific learning goals are required.

### **TOPIC OF YOUR CHOICE**

Please contact the Education Department directly (01953 715337) to discuss tailoring a session to your needs.

Sessions last approximately 40 minutes and can seat up to 30 people. Sessions are charged at £20 each and include an accompanying education pack.

Sessions can be booked by contacting Guest Services on 01953 887771.
